Profile

Software Developer with experience in Full Stack Development, backend engineering, and workflow automation using Python, Django, Django REST Framework, Flask, JavaScript, HTML, and CSS. Skilled in developing RESTful APIs, scalable web applications, ETL pipelines, and automation solutions. Proficient in NumPy, Pandas, Scikit-learn, Machine Learning, and Natural Language Processing (NLP), with experience in data analysis and predictive modeling. Experienced with PostgreSQL, MongoDB, Google Cloud Storage, Docker, Git, and CI/CD workflows. Passionate about building scalable, data-driven, and production-ready applications.

Skills

Programming Languages: Python, JavaScript, Java, C, C++

Machine Learning & NLP: Machine Learning, Natural Language Processing (NLP), Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, Tokenization, Semantic Search

Backend Frameworks: Django, Django REST Framework, FastAPI, Flask, Spring Boot

Libraries & Tools: NumPy, Pandas, Scikit-learn, Matplotlib, NLTK, Pydantic, PyPDF, python-docx, ReportLab, MoviePy, FFmpeg, Pygame

Databases & Storage: PostgreSQL, MongoDB, SQL, Google Cloud Storage

Infrastructure & Deployment: Docker, Google Cloud Platform (GCP), CI/CD Pipelines, Linux, Async Processing, API Integration

Web Technologies: HTML, CSS, JavaScript, Responsive Design

Tools & Platforms: Git, Postman, Linux, VS Code, Jupyter Notebook, IntelliJ IDEA, PyCharm

Data & BI Tools: Microsoft Excel (Advanced), Power BI

Core Competencies: RESTful API Development, Full Stack Development, ETL & Data Pipelines, Object-Oriented Programming (OOP), Database Design, System Design, SQL Optimization, Workflow Automation, Agile Methodologies

Experience

Software Developer

Feb 2026 – Present

Sanatanapp Private Limited

- Developed and launched a full-stack Movies Platform using Flask, MongoDB, and Google Cloud Storage, delivering 10+ dynamic movie pages with responsive UI and media management.
- Built a YouTube Live Stream Scheduler using Python and YouTube APIs, automating live event creation and scheduling, reducing manual effort by 80%.
- Developed a NOC Generation System using Python and Flask, reducing document creation time by 95%.
- Built an internal tools platform with 5+ media processing and translation utilities, reducing manual content handling by 80%.

Python Developer Intern

Apr 2025 – Sep 2025

TruBoard Partners, Mumbai

- Implemented Python ETL workflows, reducing manual effort by 30%.
- Developed and optimized RESTful APIs using Django and PostgreSQL, boosting performance by 25%.
- Processed and analyzed 10,000+ records with Pandas and NumPy.
- Utilized Git for version control and Docker for containerized development.

Personal Projects

J.A.R.V.I.S

[GitHub Repository](#)

Tech Stack: Python, SpeechRecognition, pyttsx3

- Developed a voice-controlled AI assistant using Python and SpeechRecognition.
- Automated web search, application control, and system tasks through voice commands.
- Improved command recognition accuracy by 15%.

EduPredict — Student Performance Prediction

[GitHub Repository](#)

Tech Stack: Python, Django, Machine Learning

- Built ML models achieving **85% accuracy**.
- Processed **1000+ records** using Pandas and NumPy.
- Improved preprocessing pipeline efficiency by **30%**.

Education

K. R. Mangalam University

2020 – 2024

Bachelor of Technology in Computer Science

S. M. Arya Public School

2017 – 2019

Grade 10th & 12th

Certifications

- Complete Python Bootcamp 2024: Zero to Expert in Python – Udemy
- Learn SQL – Codecademy
